HEALTH BOARD GIVES WARNING OF INFLUENZA DANGER

Ask People to Be Careful and Take Proper Treatment Promptly. Many Pneumonia Cases Follow Influenza. What to Do.

To be prepared for the serious outbreaks of Influenza and Pneumonia that are now sweeping the entire country, Public Health Boards everywhere are issuing cautions and instructions to the public not to neglect any symptoms. The first symptom of Influenza is cold and it is necessary to co-operate with the Board and physicians in stamping out the spread of the disease.

No disease develops or spreads so rapidly as Influenza. The first symptoms are a temperature of 98 or 99 degrees, headache, pain in the back, throat feeling dry or sore. Unpromptly checked, the temperature rises to at least 101 degrees and the patient is too ill to go to bed and stay there. It is necessary to keep warm and avoid pneumonia and let the mixture run its course and the spread of the disease to others.

In these busy days, it is not possible to lose more or less. Every effort must be made to avoid further spread. A counter-order treatment must be taken.

Probably no better or more effective treatment could be followed at a lower cost than to get the necessary drug from a Hyomei outlet consisting of a bottle of the Pure Oil of Hyomei and a little pocket hard rubber inhaling device in which a few drops of the medicine are stored. This is what you need. Put the inhaler in your mouth and breathe its air deep into the passages of your nose and throat. Your breathing organs will thus be charged with an antiseptic germ-killing basmal, which will absolutely destroy the germs of influenza that have taken root there.

You can't do this too often. The Hyomei Inhaler is small and convenient to carry. Carry it in your pocket at any time of the day and take a breath of its pure healing air into your nose and throat. Take it when you feel sick. The Grip or Influenza will last a lifetime while the Oil of Hyomei can be obtained at a little cost from any reliable druggist. Lots of people have used the Hyomei Inhaler to take it out, charge it up and blow your nose and throat clear.

A few cents spent now may prove a great help and save many lives and help stamp out the spread of the disease. Sold by The May Drug Co.'s Nine Stores and other leading druggists.
