NATION UNITES WITH STATE IN FIGHTING GRIP EPIDEMIC

Influence Grep Pandemic: Increase in Scourge Reported

Continued from First Page

Tyrone, Pa., Sept. 29 (UP) - More than 700 more cases of influenzal pneumonia are reported in Pennsylvania. The Department of Health reports the disease has spread to 19 counties, including Allegheny, Beaver, Butler, Clarion, Columbia, Crawford, Dauphin, Elk, Franklin, Greene, Indiana, Jefferson, Juniata, Juniata, Luzerne, McKean, Montour, Potter, Warren and Westmoreland.

The disease has been reported in every county of the state and is especially prevalent in the western part of the state, where it has caused the death of more than 100 persons. The death rate is highest in the western counties, where the disease has been present for the longest time.

The Department of Health has urged all physicians to report any cases of influenzal pneumonia immediately to the health authorities. The department has also advised all physicians to take all necessary precautions to prevent the spread of the disease.

The state health authorities are urging all physicians to report any cases of influenzal pneumonia immediately to the health authorities. The department has also advised all physicians to take all necessary precautions to prevent the spread of the disease.
