Field Hospital at Curtissville

The State Health Department is busy answering calls for relief outside Pittsburgh and yesterday took measures to establish a field hospital in Curtissville, in the northern part of the county, where there are 700 influenza cases. The field hospital, which will be in tents furnished by the state adjutant general's department, will have accommodations for 500 persons. Dr. E. L. Friedeman of the United States Public Health Service, arrived yesterday from Massachusetts and was put in charge of the hospital.
