GUARDS ON THE CAMPAUS

MILITARY and naval routine includes a guard post as an essential element of campus security. Princeton’s once peaceful campus has been transformed into a fortress-like environment, with a guard post and a small army of security personnel patrolling the grounds. According to the university’s official statement, the security measures were implemented to ensure the safety of all members of the community.

The campus has been divided into several zones, each under the supervision of a security officer. The guard post is located in the center of the campus, providing a strategic location for monitoring the entire area. The guard post is manned 24 hours a day, 7 days a week, ensuring that no suspicious activity is left unchecked.

The following entry was recorded in the university’s security log:

A 2 a.m. entry log shows that the guard post was active and in operation. The officer on duty reported that all is well and no incidents have been reported.

The entry goes on to state that the guard post is equipped with state-of-the-art technology, including surveillance cameras and a radio communication system, which allows for quick response to any situation.
