

BOARD OF HEALTH NOTICE

While the way is opened for the lifting of the Quarantine, owing to number of cases in and about the town, the local Board of Health authorities deem it inadvisable to lift the ban at this time. Following is the official notice:

October 22, 1918.

To LOCAL BOARDS OF HEALTH.

Take notice that upon the presentation to me of satisfactory written evidence that the epidemic of influenza in any municipality has so subsided as to make it safe to reopen certain places closed by my order to local boards of health dated October 5, 1918, I will withdraw that portion of said order relating to the closing of churches, places of amusement, saloons and other places where people congregate, insofar as it relates to said municipality and will authorize local boards of health to permit the reopening of such places.

Such evidence shall include a written statement, signed by the president or executive officer of the local board of health showing

1. The number of cases of influenza by days for the past 10 days.

2. The number of deaths from influenza by days for the past 10 days.

3. The number of cases of pneumonia by days for the past 10 days.

4. The number of deaths from pneumonia by days for the past 10 days.

5. The total number of cases and deaths from influenza since the beginning of the epidemic.

6. The total number of cases and deaths from pneumonia since the beginning of the epidemic.

Together with such other information as is available which tends to show that but few or no new cases of influenza are occurring.

If the evidence presented by the board of health of any municipality convinces me that the epidemic of influenza has in fact subsided sufficiently to make it safe to rescind these regulations insofar as they relate to such municipality, written permission to reopen the places closed by said order will be issued forthwith.

J. C. PRICE,

Director of Health.
