TO ENFORCE ORDINANCE.

As the result of complaints filed at the mayor's office the anti-spitting order is to be strictly enforced. The Public Safety and Director Charles H. Parks has issued orders to police officers to prevent spitting on the streets or sidewalks and on the sidewalks of public conveniences. Director Day has asked the Superintendent of Police to assist in the enforcement of the ordinance.

PARDONED ORuled.

During the course of his investigations, it has come to the attention of city authorities that a number of public requests for pardons have been made. A number of pardons have been issued, but the health department has taken no action to revoke the pardons. The mayor has directed this morning that the nurse and all persons connected with the department of health and the hospital will continue to enforce the anti-spitting order.

DEATH AT TARENTUM.

Tarentum district, Alice Ada, 25 years old, a Negro, of the Tarentum district, died of pneumonia last night. The body was taken to the hospital, and the coroner's inquest will be held tomorrow.

INCREASES IN CAMP INFLUENZA CASES.

89,478 New Influenza and 6,655 New Pneumonia Cases Develop During Week.

WASHINGTON.

WASHINGTON, D.C., Oct. 15.-A report from the head of the Department of Health indicates that the number of cases of influenza and pneumonia is increasing. The city is under a state of emergency, and all schools and institutions are closed.

ARMY NOT ALARMD.

Local army medical men saw no reason to alarm the nation, as the report indicates that the situation is under control. The situation is not as serious as it was during the first week of the outbreak.

Local Health Department Is Not Disposed to Take Any Chances. However.

2,364 CASES IN CITY.

According to the tabulation which has been made by the city bureau of statistics, there are 2,364 cases of influenza in the city. Of this number, 639 have been reported since 1 o'clock yesterday afternoon. For the past 24 hours there were 254 cases.

The number seems large, but the health authorities are not alarmed, as they believe that the disease is under control. The health authorities are working hard to keep the disease under control and to prevent its spread.

There has been a discussion among the medical profession regarding the advisability of the army being evacuated from the city. This is difficult, however, as the army is needed for other purposes.

There has been a communication with New York authorities in regard to obtaining a supply of anti-influenza medication.
