

INFLUENZA EPIDEMIC WILL SOON BE OVER

Fewer New Case and Deaths Reported in Last 24 Hours. Pitt to Reopen.

The lowest 42-hour report since the influenza became epidemic was made this morning by the local department of health. From 4 o'clock Saturday afternoon until 10 o'clock this morning but 145 cases of the disease were reported. This is a large decrease. The total number of cases reported today is 13,168.

A decrease in the deaths from influenza and its complications is also noted. From 8 o'clock until 10 o'clock this morning but 16 deaths were reported. Pneumonia caused 7 deaths, influenza-pneumonia 7 and influenza 2.

From 10 o'clock Saturday morning until 10 o'clock this morning 146 deaths were reported. Pneumonia caused 55 to succumb, influenza-pneumonia 79 and influenza 12.

The influenza quarantine at the University of Pittsburgh was lifted today by Chief Surgeon E. W. Day, and normal activities will be resumed Wednesday morning. It is not possible to notify all students of the university to report tomorrow, hence the opening was delayed until Wednesday.
