SANITARY REPORT

For the month of October, 1918, at S.A.T.C. Princeton, N.J.
(Designation of post or command.)

From: THE SURGEON.

To: THE COMMANDING OFFICER.

I submit the following report on the sanitary condition of this command during the month designated:

1. Public buildings and grounds, or camps and their surroundings: All grounds properly maintained by University authorities.
2. Drainage, sewerage, and disposal of wastes: Drainage carried away through underground drains. Sewage carried off through underground sewer pipes and disposed of at University Sewage Disposal Plant one mile from campus. All waste carted away by Univ. employees.
3. Sanitary appliances (filters, sterilizers, incinerators, odorless excavators, etc.): Necessary sanitary appliances used by University in buildings and mess hall.
4. Water supply: Water supply secured from artesian wells through Princeton Water Co.

5. Food supply and its preparation: Food supplied and prepared by University at University Dining Halls, where all latest improvements are installed for this purpose.

(a) Quality of the milk: Milk good.

(b) Condition of dairies: Milk pasteurized before being delivered to mess

6. Clothing of the men: All men equipped with cotton uniforms which are too light for cold weather coming on.

7. Character and causes of prevailing diseases, and measures taken to prevent them:

Epidemic of Influenza, of a mild type; one case complicating in bronchial pneumonia.

Measures taken to prevent Influenza: isolation of patients, sterilization of patients' clothes, and general quarantine of the command.

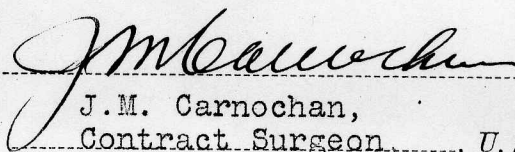

8. Dates of semimonthly physical inspections of the command (by organizations):

The whole command was given venereal inspection on Oct. 28, 1918.

(a) Number of new cases of venereal disease, none; rate per thousand of strength,

(b) Number of venereal prophylactic treatments given: none.

9. Recommendations: For the health of the command I recommend that heavier clothing be provided.

 J.M. Carnochan,
 Contract Surgeon, U. S. Army.

Date, November 11, 1918.
