OFFICIALS GET FIGHTING GRIP OVER EPIDEMIC

Deaths Number 91; Total of 19,656 Cases Thus Far Reported in City

DANGER STILL GREAT AS EVER AND WARNING IS ISSUED AGAINST CARELESSNESS

550 CASES YESTERDAY

We have a good grip on it, said City Health Officer William C. Heasler last night as he scanned the figures leading to the first time in ten days a drop in the daily report of cases for 1966.

We have a good grip on it, but we do not have it conquered, the director said. The danger is as great as ever, and the worst is yet to come. The policy of the people is the only hope for us, and people cannot control their lives. We want to fight the disease and not be discouraged. The grip on the city is strong, as Easterne cities have done, we must take every possible measure to control the spread of infection.

Actual cases reported Tuesday, totaling 250, of which 125 were paragraphed, reached the day's rise in influenza and its complications number 51. 51 cases were in the city on Tuesday, 1965, and of these 51, 1965, 51 were in the city on Tuesday, 1965.

In addition to the 51 cases, there have been 103 cases of bronchitis and pneumonia in the city this week, 103 cases of bronchitis and pneumonia have been reported.

The record of pneumonia cases taken to the hospital is further evidence of the grip in the area. Although the number of new cases hand carried Wednesday to 133, only three less than the record, the grip on the city remained strong and remained strong.

The hospital situation was reported much better today. There were 133 patients in the hospital, against 134 in the previous night. The hospital situation was reported much better today. There were 133 patients in the hospital, against 134 in the previous night.

In the hospital situation, the death rate for bronchitis has been lower than for pneumonia, due largely to the nature of pneumonia. But that for bronchial pneumonia has been lower than for pneumonia.

PNEUMONIA FALLS OFF

The grip on pneumonia cases taken to the hospital is further evidence of the grip in the area. Although the number of new cases hand carried Wednesday to 133, only three less than the record, the grip on the city remained strong and remained strong.

The hospital situation was reported much better today. There were 133 patients in the hospital, against 134 in the previous night. The hospital situation was reported much better today. There were 133 patients in the hospital, against 134 in the previous night.
