HASSLER WARNS CITY AGAINST CARELESSNESS IN WEARING OF MASKS AS NEW CASES DECLINE

Health Officer Believes San Franciscans Will Be Obliged to Cover Faces for 2 Months; Auction Permit Revoked on Complaint of Dealers; 68 Deaths Reported

ONLY sixty-two new cases of influenza were reported to the Health Board yesterday. This is a falling off of nineteen from Monday's record. There were 297 cases of the malady reported by letter, 66 against 460 delayed. Dr. Hassler said that on Sunday there were eighty-seven deaths. Thirteen thus the total number of those reported to have died from influenza during this week. Dr. Hassler, acting in the capacity of medical officer in charge of the medical department of the city, reported that the number of cases reported to him as having died from influenza has now reached 18,800.

TARELESS TENDENCY

Though it pleases Health Officer Hassler to make the statement, he regrets the public's tendency to become careless. "Now is the time to do the biggest fighting," he says. "We are in a critical period in the history of our city, and it is essential that we all cooperate in the fight against disease." The germ knows neither family, nor friend, nor foe, says Dr. Hassler. "In every city throughout the world, the germ is spreading, and it is essential that we all do our part in the fight against it." The HLC is now working with the Red Cross to set up new hospitals in the city to deal with the influx of patients. The HLC has also increased the number of ambulances and medical personnel to ensure that no one is left behind.

BLAZES EUPHONIC

The history of other cities, Paris, London, and Eastern communities, is not to be duplicated here, and it is essential that we all cooperate in the fight against disease. The Red Cross and the HLC are making all possible efforts to assist in the fight against the malady. The Red Cross hospital in the Civic Center, which is currently being built, will begin operations next week. The HLC has also set up several new hospitals in the city to deal with the influx of patients. The HLC has also increased the number of ambulances and medical personnel to ensure that no one is left behind.

DAWN'S ELEGANCE

"When the germ has been completely stamped out, the fight will be over," says Dr. Hassler. The HLC will continue to work with the Red Cross and other organizations to ensure that the fight against the malady is won. The Red Cross will continue to provide medical aid to those in need, and the HLC will continue to work with the Red Cross to set up new hospitals in the city to deal with the influx of patients.

DANGER POINTED OUT

Painted said he had learned to know, because he would have to hire his people in the East and in Canada to come out at once. He also reported that the HLC is planning to send out a team of medical personnel to infected regions to renew the local infection, and that masks will be used.
