INFLUENZA URGED AS INFLUENZA PREVENTIVES

NEW YORK, October 15.—Wearing of chiffon veils was advocated yesterday by Royal S. Copeland, health commissioner, as one means of checking New York's continually spreading epidemic of Spanish influenza.

Dr. Copeland said the veils would serve as an almost infallible protection, and it may become necessary to order everyone in New York to adopt them.

The New York Telephone Company to-night sent out an appeal to subscribers to use the telephone only for urgent calls, as a large portion of its operators are ill with influenza.

NURSE DIES IN FIGHT ON GRIPPE

When Servants Flee Miss Broughton Cares for Seven Patients; Death Follows.

With two deaths the new reports brought by the morning papers yesterday, the epidemic of Spanish influenza was further accelerated throughout the nation.

A young woman, a resident of Berkeley, who contracted the disease in the midst of an epidemic of influenza, was admitted to the hospital yesterday afternoon, and was pronounced by her doctor to have a case of influenza of a grave nature.

Miss Alice Broughton, the nurse, was the last of the group to reach the hospital, and was not able to get at the table of the exhausted and ailing sick woman. She remained until the last moment, when she was called to nurse a case of influenza, and within a few days seven members of the family she attended were sent to the hospital. She remained alone to combat the disease. Unrestrained by anything but her sense of duty, she continued her labors with courage and determination.

INFLUENZA IS NOT EPIDEMIC IN STANFORD

PALO ALTO, October 16.—While there are a number of Spanish influenza cases in this city, Stanford University, there has been no epidemic reported at the university hospital.

The first case of the disease reported in the city was a young man who was treated at the hospital.<br><br>132 NEW CASES REPORTED

SAN JOSE, October 16.—One hundred and thirty-two cases of Spanish influenza were reported by the hospital yesterday.

The one death, that of Perot Crow, 21 years of age, brought the total up to 132.

L. A. CABARETS CASE

BURLINGTON, October 16.—Orchestra concerts, cabaret entertainments, and other events that might serve to draw or hold a large audience to the city were banned by the Board of Health earlier this week, as a precaution against the spread of influenza. The board previously ordered the closing of theaters, motion picture houses, and other places of amusement.

It has thus far been determined that the disease is spread by the principal infected persons, and not by the minor cases. No cases of the disease have been reported today.

The Board of Health, in its annual report, has said that it is essential to prevent the spread of the disease, and the public is requested to keep its activities to a minimum.

The epidemic draft will be held on October 12, as follows: 132 new cases reported yesterday. This brings the total to 132.

The health officer said that the spread of influenza has been held in check by the measures taken, and that the city is in a healthy condition.

Epidemic draft.

WA. M. HALL, October Draft.

WASHINGTON, October 15.—For the first time in the month, the health officer has recommended that all places of amusement be closed, as a precaution against the spread of influenza.

The outbreak has been caused by a number of persons who have been exposed to the disease.

One hundred and thirty-two cases have been reported in the city.

The health officer has stated that the spread of influenza has been held in check by the measures taken, and that the city is in a healthy condition.

Epidemic draft.
