Orders Are Orders, Even for Masks

Wise Doctors Know What Is Best

Mosquito-Theory Once Was a Joke

BY ANNIE LAURIE

Two young expatriates, both of them being quite healthy and not afraid of mosquitoes, had just taken a trip to Italy and Spain and were now back home. They were staying in a small town by the sea, and every evening they would go for a walk along the beach.

One evening, they were walking along the beach when they noticed a group of children playing with a large toy fish. The children were all laughing and having fun.

The young expatriates watched the children for a while, and then one of them turned to the other and said, "Isn't it funny how something as simple as a toy fish can bring so much joy?

In that moment, the other young expatriate had an epiphany. "You know what?" he said, "Mosquitoes are just like toys. They might not be the most comfortable thing to have around, but they can still bring us joy."

The two young expatriates decided to start a campaign to raise awareness about the importance of mosquito control. They started by distributing flyers with information about the dangers of mosquito bites and how to protect oneself from them.

Their campaign gained a lot of attention, and soon people were coming to them for advice on how to keep mosquitoes away from their homes.

One day, a local doctor came to them and said, "I've heard about your campaign. It's great work. But let's not forget the importance of following orders."

The young expatriates looked at each other and smiled. "You're right," one of them said. "Orders are orders, even for masks."

The doctor nodded and continued, "But wise doctors know what is best. Mosquito-theory once was a joke, but now it's a serious matter."

The young expatriates agreed and thanked the doctor for his advice. "We'll keep working hard to raise awareness about mosquito control," they said.

And so, they continued their campaign, spreading awareness and educating people about the importance of mosquito control. And although it was a difficult task, they knew that it was worth it.
