I. District Health Officer

In my experience, the health of a community is an essential factor in the success of education. Educators and health professionals must work closely together to ensure that students have the best possible environment in which to learn. The health of children is directly linked to their ability to concentrate, learn, and achieve academic success. It is crucial that we address any health issues early and provide the necessary support to ensure that children are healthy and ready to learn. This includes regular health screenings, access to medical care, and education on healthy habits. Only by working together can we create a supportive environment that promotes the health and well-being of all students.
