## Report of Visiting Physician

MR. THOS. S. McALONEY, *Superintendent.*

DEAR SIR: During the recurrence of the influenza in the late winter, there were no cases appeared in our school and no case of pneumonia during the time it was prevalent in the city. The value of medical supervision and co-operation by the governesses and parents has been a large factor in these conditions. During the time measles was epidemic, there were a few cases in the kindergarten which were promptly recognized and removed to the Municipal Hospital. This epidemic in the city in no way interfered with the school course. There was a small group of children found to be carriers of diphtheria, one case having been removed to the Municipal Hospital suffering from that disease. These were segregated, immunized and the spread was checked. There have been several cases of fracture which have been treated in Mercy Hospital with good functional results. We have in no way been embarrassed by serious illness.

Respectfully,

J. I. JOHNSTON,

*Visiting Physician.*

## Report of Dental Surgeon

MR. THOS. S. McALONEY, *Superintendent.*

DEAR SIR: The following is a report of the work done in your Dental Clinic during the past year.

Prophylactic Treatments .....	21
Extractions .....	19
