

INFLUENZA SITUATION BAD IN AND NEAR EASTON

Thirty-one Deaths Over Sunday—State Called on For Help.

With thirty-one deaths from Spanish influenza reported Monday in Easton and Phillipsburg, doctors admitted that the epidemic has grown to such alarming proportions that they were no longer able to cope with the situation. Dr. J. J. Condran, health officer, wired to Dr. Royer, acting health commissioner, for help, and the latter promised to send physicians to Easton if able to obtain them.

Local physicians have been working day and night and are unable to visit all the patients. One child died without medical attendance, his parents being unable to obtain a physician. It was necessary for the prison inspectors to call for volunteers among the prisoners in the county jail to dig graves in the cemeteries. A dozen prisoners were detailed for that purpose.

Joseph Lampers, Connellsville, Pa., Camp Lafayette soldier.
