

COOL CLEAR WEATHER MAY ALLAY INFLUENZA

One hundred and four new cases of influenza were reported to the local board of health yesterday, which is a drop of fifty-four cases from Wednesday, and bears out the theory that the big number of cases reported on Wednesday was just a spurt due to the fact that some physicians had not reported their cases promptly. However the number reported yesterday is considerably more than had been coming in lately. With cool, clear weather the authorities do not believe there is any danger of the epidemic spreading.

Among the cases reported yesterday are several where whole families are stricken: At No. 1412 Chew street Mrs. Fred Snyder and four children, Dorothy, Gerald, Marion and Sterling, are ill. At No. 1410 Gordon Mr. and Mrs. Chester Bauscher and three children, Malcolm, Steward and Chester are ill. In the Ward family at No. 813 North Sixth street, six are ill. They are Mrs. Myrtle Ward, Paul, Marion, Jeane, Helen and Muriel.

Benjamin Dorshimer, proprietor of the saloon at No. 616 Hamilton street, and Horace McCready, of No. 103 North Fourth street, are also among the new cases listed.
