

WJM/jah

November 9, 1918.

Lt. Col. F. B. Lund, M.C.,
Surgical Group #11,
Camp Crane, Allentown, Penna.

Dear Dr. Lund:

The Surgeon General directs me to thank you for your very lucid report of the Nozinge method of treating Epyema. He is much impressed with the subject matter and believes that your recommendation of having it taught to officers detailed from the various hospitals is wise.

Very truly yours,

Wm. J. Mayo,
Colonel, Medical Corps, U.S. Army.
