

May 26, 1920.

Colonel Richard Slee, M.C.,  
Swiftwater, Pennsylvania.

My dear Colonel Slee:

Referring to your account of the favorable influenza rate at Camp Crane, let me say that this has been read with much interest. Thank you for this information. It has been presented before the Advisory Committee on Respiratory Diseases and was a subject of interest there also.

Why don't you write up an article for publication in the Military Surgeon respecting Camp Crane? In my opinion this would be the best way to give it wide circulation for I am sure the knowledge of the splendid work accomplished at your post is of considerable value.

Thanking you for your co-operation, I am

Very sincerely yours,

Charles Lynch,  
Colonel, Medical Corps.

710.-1 (Camp Crane) e
