

INFLUENZA RESIDENCES BEAR CARDS

As we go to press the city council is in session and has ordered that all places where there is Spanish influenza shall be placarded and fumigated. Further proceedings of the council will be published tomorrow.

NURSES WANTED TO CARE FOR INFLUENZA VICTIMS

Silverton this morning makes a request for Durango to send nurses and at least one doctor. Their hospital is full, and 35 cases are being cared for as best they can at the City Hall, which has been temporarily turned into a hospital. The need is very urgent for nurses, and if any person who reads this can be of nursing assistance they are earnestly asked to arrange to go to Silverton on this evening's train. The matter is in the hands of the La Plata County Red Cross Chapter. Transportation and expenses will be paid from Red Cross funds.

If you can be of service, or know of some one who can, please phone or call Chas. E. Hall at the Durango Exchange at once.
