

SILVERTON TERROR

SLIGHTLY ABATED

The health condition of the Silver-ton section was somewhat improved this afternoon. Mayor Crooke, at 2:45 this afternoon stated that the conditions in the city proper were such that daylight now appeared through the darkness of sorrow in which the city had been enveloped. There are not so many new cases in the town but that the conditions in the mines was much worse. The city authorities will be rushed for several days yet attending to the sick, the dead and the funerals.

The crying need is for more nurses, he stated.

There were ten deaths up there last night and this morning.

Ten persons were buried today.

There are ten bodies in the morgue.

Chester Black goes up tonight to help in the undertaking work.

The Durango Exchange is arranging for some ladies to go up and help out in the homes.

The local ladies are sending up jars of broth for the sick, that is much appreciated.

THEY WANT NURSES
