

# DAVID A. ANDERSON DIES AT CAMP DIX, NEW JERSEY

## Succumbs to New Disease of Spanish Influenza Richie Walker Also Seriously Ill at Same Camp

### RICHIE WALKER SICK AT CAMP DIX OF INFLUENZA

Richie Walker is another Gunnison boy is in very serious condition from pneumonia, caused by Spanish influenza. Richie is also at Camp Dix, N. J. His mother, Mrs. Phoebe Walker, received a message Tuesday night telling of his condition, and yesterday morning in response to telegraphic inquiry received another dispatch to the effect that he was still in serious condition and that she would be welcome if she desired to come. Mrs. Walker left last evening to be at the bedside.

Another gold star has been added to the service flag of our county. Wednesday afternoon a telegram was received from Camp Dix, N. J. telling of death from pneumonia, due to Spanish influenza, of David Anderson of Baldwin.

David was just a lad when he left but a bright boy, and with many friends who will be grief stricken to hear of his sudden death, before even he could get to France. However, he did his part in the preparations for the great conflict and deserves the same star of glory for death in the service of his country.

David was the son of Mr. and Mrs. Chas. O. Anderson, of Baldwin.

David S. Anderson was born at Sioux City, Iowa, Oct. 17, 1893, making him almost 25 years old. The family came to Baldwin in 1885 so that David was brought up from childhood in that community. Besides his father and mother two brothers and two sisters survive.

He was inducted into service on June 28, going from Gunnison to Camp Cody. He proved capable in the training camp and was quite recently examined for overseas service and accepted. The death occurred at the Base Hospital in Trenton, N. J. on September 25. The body is being shipped to Gunnison for burial, but can hardly arrive before early next week.
