

The influenza and pneumonia have caused a startling increase in Denver's death list. For the week ending Oct. 5 the total number of deaths was 43; for the week ending Oct. 12, 109; week of Oct. 19, 203, and the week of Oct. 26, 217. This makes a total of 572 deaths, and is, it is said by Miss F. Leach, registrar of vital statistics, the largest number of deaths of any one period in the history of the city.
