

## 5 NEW INFLUENZA CASES REPORTED HERE

Five new cases of Spanish influenza in this city were reported to the Board of Health yesterday, and were made public by Dr. William C. Hassler, city health officer, last night. The cases are:

- Arnold Reinblmer, 1689 Haight street, reported by Dr. J. A. Haderic.
- Mrs. B. E. Birnman, 202 Sixth avenue, reported by Dr. A. A. O'Neil.
- Mrs. Walter A. Gleser, 642 Fifteenth avenue, reported by Dr. Sidney Dandenbaum.
- Charles Dow, 825 Howard street, reported by a district nurse.
- Charles Nelson, 3727 Twenty-fifth street, reported by Dr. R. B. Stone.

Dr. Hassler said last night that the public should be particularly careful during the rainy days to avoid wet feet, which might easily bring on influenza. In families where there are cases of the disease, Dr. Hassler said the greatest care should be taken to isolate the patient from the rest of the family, never using plates or utensils used by the patient until such utensils have been scalded in hot water.
