

# *Influenza Decreases Stockton Clearings*

Special Dispatch to The Chronicle.

STOCKTON, October 24.—Stockton bank clearings showed a slight decrease for the week ended today, when the clearings were announced by the Chamber of Commerce as \$1,901,896. The clearings for the corresponding week a year ago were \$1,977,210, and the loss reported this week is 3.8 per cent. Bankers and business men attribute the falling off to the general depression in retail circles, caused by the influenza epidemic.
