

# 16 NEW CASES OF INFLUENZA FOUND IN S. F.

Victims Are in Widely Scattered  
Sections of the City; Three  
Naval Guards Are Attacked

113,737 Cases in Army Camps in  
U. S. Since Disease First Be-  
gan; 331 Deaths in 24 Hours

Sixteen new cases of Spanish in-  
fluenza in San Francisco were report-  
ed yesterday to the health depart-  
ment. This made a total for the city  
to date of twenty-four cases.

The new cases made public by Dr.  
William C. Hassler, health officer,  
are:

Miss Caroline Shepard, 670 Eddy  
street; reported by Dr. W. A. Nay-  
lor.

William A. Mathewson, 1533 Ma-  
son street; Dr. A. Musante.

Three members crew of vessel  
from Fiji Islands; French Hospital.

Miss Gertrude Koche, 1084 Golden  
Gate avenue; Dr. A. D. Nelson.

J. H. Parrant, 451 Buena Vista  
avenue; Dr. A. W. Mansfeldt.

Albert Harris, 70 Clifford street;  
Dr. Ralph Scheuer.

Frank Caney, 1377 Fairfax ave-  
nue; Dr. William Quinn.

Three members naval guard,  
waterfront; Mare Island Hospital.

Miss M. Palise, 2270 Mission  
street.

Emma, John and Julia Vanducchi,  
1375 Fairfax avenue; Dr. William  
Quinn.

Dr. Hassler said:

The spread of the disease here  
now will be very rapid. Cases so  
far reported show that the disease  
is distributed in every section of  
the city and an exceedingly large  
roll of cases can be expected. The  
disease travels rapidly, as is evi-  
denced along the Atlantic sea-  
board. Those persons who have  
the first symptoms of a heavy cold  
should immediately take a saline  
laxative, repair to their beds and  
call a physician. This is impera-  
tive. The first thirty-six hours are  
the critical period with a person  
who is afflicted.
