

## WORKERS WEAR MASKS.

SAN DIEGO, October 18.—In its effort to prevent further spread of influenza the health board to-day issued additional regulations, a feature of which was a drastic order requiring every person employed in catering to the public to wear a gauze face mask to cover the mouth and nose.

Among those affected are clerks in the large stores and employees of factories, waiters, barbers, bartenders and grocery clerks.

## CAMP LEWIS ORDERED RIGIDLY QUARANTINED

CAMP LEWIS, Tacoma, Wash.—October 18.—Beginning at reveille—5:45 o'clock tomorrow morning, Camp Lewis will be quarantined.

More than 4,000 cases of influenza have developed here during the last week, but these cases are not of the most virulent type. To prevent the more virulent form entering camp the quarantine was ordered.

Practically the only visitors who will be allowed to come here will be duly authorized persons delivering supplies. Guards will be stationed along the highways to prevent egress or ingress of unauthorized persons.

There were 154 new cases of influenza reported in camp today. The highest mark yet reached was 312 new cases on October 12. There were 35 new cases of pneumonia and four deaths. Yesterday 12 deaths were reported all due to pneumonia.
